SUMMARY

- Over 6+ years of experience in developing web applications using Drupal8, 9 & 10, PHP, JavaScript, JQuery, Ajax, HTML, Bootstrap and Cascading Style Sheets.
- Competent with PHP MyAdmin, MySQL, and SQL Databases.
- Professional understanding of the Software development life cycle (SDLC), as well as various phases such as Requirements Gathering, Analysis/Design, Documentation, Development, and Testing.
- Proficient in Drupal 8/9/10, including custom module and plugin development using configuration management, entities, and dependency injection.
- Experience in developing web-based applications using PHP, XML, CSS3, HTML5, and JavaScript.
- Excellent experience in Content Management System in Drupal.
- Experienced in installing, configuring, modifying, and testing existing Drupal modules and themes.
- Experienced in working with composer, CCK, Views, Panels, Cronjob, Rules, Features, blogs, theme development, Docker, and Drush API.
- Familiar with understanding client requirements, conducting system analysis, designing, developing & testing applications as per system requirement specifications.
- Solid understanding of OOP best practices in PHP.
- Proficiently understand usability guidelines and ensure accessibility compliance across web development projects, demonstrating a commitment to inclusive design principles and seamless user experiences.
- Proficient understanding of code versioning tools, such as GIT and SVN.
- Experience with Drupal hosting providers Acquia & Pantheon.
- Possess experience and understanding of agile software development methodologies.
- Extensive experience in developing and managing websites for university institutions and non-profit organizations, demonstrating a deep understanding of their unique requirements and objectives, and delivering tailored solutions to meet their specific needs.
- Experience in REST & SOAP Based Web Services.
- Maintain a strong understanding of application security methodologies, ensuring adherence to best practices and standards to safeguard sensitive data and protect against potential threats in web development projects
- Expert in developing applications using Lando, WAMP, XAMPP and LAMP platforms.
- Capability of client handling and requirement analysis.
- Hands-on experience in using VS Code, Atom, PHPStorm, Eclipse, NetBeans.
- Experience in using tracking tools such as Jira & Trello.

TECHNICAL SKILLS

HTML5, Bootstrap, PHP, WordPress, Laravel, MySQL, JavaScript, JQuery, CSS3, Ajax, Drupal, Python, Selenium, SQL, Flask, React.

EDUCATION

Dec 2023

Master's in information systems

University of Nevada, Reno- USA

Idfive - USA

Jan 2024 – Present

Senior Drupal Developer

- Actively participated in the development, architecture review, and analysis of Drupal 9 & 10 CMS-based sites, leveraging expertise to ensure optimal functionality and performance

- Led the development of high-quality custom modules and plugins, tailored to meet specific project requirements and enhance site functionality.
- Seamlessly integrated frontend code into custom Drupal themes, maintaining a cohesive user experience and adherence to project specifications
- Evaluated and extended contributed Drupal modules, leveraging deep expertise to customize solutions and maximize compatibility.
- Collaborated closely in bug resolution efforts through ticketing systems, consistently meeting monthly targets and ensuring a high standard of site performance
- Demonstrated expert proficiency in PHP and HTML, shaping the backend and frontend landscape of projects with precision and expertise.
- Showcased advanced mastery in CSS/SCSS and JavaScript, elevating the visual appeal and interactivity of Drupal-powered websites.
- Championed the adoption of container-based local development environments, such as Lando, to standardize processes, increase efficiency, and maintain consistency across development environments.

Environment: Drupal9 & 10, HTML5, CSS3, SCSS, Pattern Lab, PHP, Linux, Lando, MySQL.

UNR School of Medicine - USA

May 2023 – Jul 2023

Web Developer Intern/Drupal Developer

- Implemented the search functionality.
- Created templates, menus, pages, and blocks using Drupal9.
- Daily content changes migrations as per Business requirements, such as creating/updating page content, to accept improvised validations.
- Ensured website accessibility in accordance with WCAG guidelines, making the content accessible to a diverse audience.
- Analyzing Business & Functional Requirements and Developing Business Processes as per the Functional Specification.
- Developing the custom modules and custom theme as per the requirement.
- Excellent organizational skills and ability to prioritize tasks among many competing requests.
- Developed and maintained Drupal Views to display dynamic content.
- Managing end-to-end application development projects.

Environment: Drupal9, HTML5, CSS3, PHP, Linux, Bootstrap, JavaScript, AJAX, and MySQL.

TechMahindra – India

Apr 2020 – Dec 2021

Sr. PHP/Drupal Developer

- Managing end-to-end application development projects.
- Implemented Google Tag Manager.
- Worked on creating blocks, modules, and the CMS side of Drupal.
- Developed compatible User Interface functionality using JQuery, Ajax, JavaScript & other libraries.
- Performing code reviews and handling the scope and requirements of the projects.
- Optimization of Load test results, resolving vulnerability issues.
- Implemented Slack Chat Integration and Google Shared Drive integration in Drupal.
- Developed the custom modules and twig files as per the requirement.
- Implemented the presentation layer with HTML, JavaScript, Ajax, CSS, jQuery.
- Used various Drupal tools including Drush, Views and CCK, and also Developed Custom modules, Layout Builder, Paragraphs and Drupal templates.
- Fixed requests, root cause analysis of the error as required to resolve an error condition.
- Implemented various Validation Controls for forms validation and implemented custom validation controls using Object Oriented JavaScript.

Environment: Drupal8, HTML5, CSS3, PHP, Linux, JavaScript, AJAX, and MySQL.

Valuebound, India**Mar 2018 – Mar 2020****PHP /Drupal Developer**

- Worked on custom panels, blocks, content types, and views to customize the look of the site.
- Building the web pages from scratch using Drupal8.
- Installed and configured Drupal on several environments; Development, staging and testing.
- Used JavaScript with JQuery and Ajax to provide elegant user interfaces.
- Involved in content change migrations as per Business requirements, such as creating forms, and updating the existing forms to accept improvised validations.
- Implementing the project as per scheduled deadlines; extending post-implementation and maintenance support to the team and client.
- Wrote code for multiple chained selects using JQuery select and JavaScript.
- Created custom 404 pages for error reporting.
- Modifying PHP, HTML, CSS, Javascript, and jQuery according to project requirements.
- Implemented SEO-based Drupal modules optimizing the search function all over the site.
- Performed system upgrades to Drupal websites, including Drupal core, contributed modules, and custom theme upgrades.
- Involved in Drupal Migration.
- Conducting system study and coordinating with team members for system design & Integration, Application Maintenance, etc.
- Imported and exported data from one Drupal website to the other using Node Export.
- Involved in upgrading the Drupal site with the latest version.
- Involved with Quality assurance of own work, code testing, cross-browser testing, etc.
- Design & development of Key functionalities of the application and design documentation.

Environment: Drupal7, PHP, HTML, CSS, JQuery, JavaScript, MySQL, Windows**Iblesoft PVT LTD, India****Mar 2017 – Apr 2018****Sr.PHP Developer**

- Involved in creating a web-based management system for the client using Drupal 7 and developed custom modules to support the system.
- Worked with HTML, DHTML, CSS, JavaScript, jQuery, and JSON on UI pages.
- Worked on integrating with Kibana and HUD display for error logging and monitoring.
- Created tables, and stored procedures for data access and manipulation.
- Used AJAX to reduce page reloads.
- Implemented Session Handlers to be persisted into the MySQL database tables.
- Created and used SQL Queries, Scripts, and Stored Procedures for data validations.
- Extensively worked with LAMP, MySQL, PHP, and AJAX on a variety of Internet platforms, including Windows, Linux, and Apache.
- Experienced in Designed & developed web pages using JavaScript, HTML, HTML5, CSS, JQuery and XML.
- Experienced in Internet platforms, including Windows, Linux, and Apache.
- Cleaned up and rewrote the front-end using HTML, JavaScript, and CSS to meet validation requirements.
- Used PHP-MYSQL connectivity to access the required data from the database.

Environment: PHP, HTML, CSS, JQuery, JavaScript, MySQL, Windows XP & 7, Linux.**Mobilerays – India****Feb 2014 – Mar 2017****PHP Web Developer**

- Developing and creating PHP MySQL applications as per the specifications.
- Implementing the project as per scheduled deadlines; extending post-implementation and maintenance support to the team and client.

- Conducting system study and coordinating with team members for system design & Integration, Application Maintenance etc.
- Keeping track of website visits, updating new content displays on websites.
- Coordinating with team members in developing database structure.
- Design and hand coding of new websites using PHP / JavaScript / jQuery / AJAX

Environment: PHP, HTML, CSS, Ajax, JavaScript, JQuery, MySQL, Linux
